WORK INTENTIONS

BACKGROUND

As I gleaned through the available data, and after adjusting to the rate of inflation, I feel our income per annum though increased to a certain extent in absolute terms over the years, actually decreased by about 25% in real terms. Mercifully, our expenses remained more or less static at around 680,000 US dollars per annum at current rate of exchange. Though the financial situation is better

than that of 15 years ago it still demands constant vigilance and careful nurturance.

AIMS AND OBJECTIVES

1. My primary aim would obviously be to enlarge the Income - expense gap which stands now at a modest 120,000 US dollars per annum approximately. As the expenses are unlikely to show a downward trend, in fact we may consider ourselves lucky if they maintain the current trend, my main focus would be income generation.
2. Conference surplus, yearly contribution of member societies and corporate support have been the main income generators for us. I would like to believe that there could be some scope still to plug loop holes.
3. If elected I would make a determined and continuous endeavor to reach out and draw on the brains of the Board to put the collective genius of 18 persons of proven experience and expertise in my march towards the objective of betterment of the financial health of our Association.
4. I will devote time to have a fresh look at the accounting procedures, investment portfolios, assessment of assets and methods of audit with a view to gain a better understanding of things wherever needed and share the picture up and down the hierarchy to iron out the wrinkles collaboratively.
5. I will apply myself to fine-tune the mechanisms to monitor, review and reassess periodically the assets and liabilities of our association
6. I would maintain crystal clear transparency in monetary transactions, financial status and fiscal measures to enable the members of the Board and the Executive to have a correct picture of our finances all the time to enable them to guide

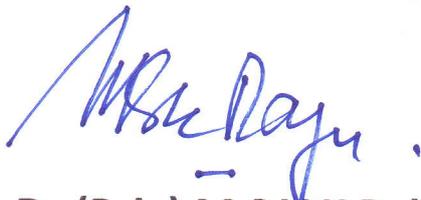

me in carrying forward the mission of bringing our finances to a healthy pink.

7. I will make constant efforts to resolve the audit objections, if any are there, under the guidance of the honorable President and other members of the Executive.
8. I will continuously liaise with the Board, Executive and the member societies to explore new avenues to generate funds and strengthen the sub-optimally functioning existing income machines.

CONCLUSION

I am aware of the fact that I need to come to grips fully with the disposition of our assets, liabilities and operating methods before chalking out a plan and spell out the specifics explicitly. I promise nothing but honesty, hard work and abiding loyalty to our esteemed Association.
